Structural and functional asymmetry of plasma membranes

23-25 April 2025 | London, UK

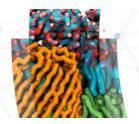

Faraday Discussions

Wednesday 23 April 2025

11:30	Registration with lunch served from 11:45
12:45	Welcome and introductions
	Chair of Scientific Committee
12:55	Outline of Discussion format
	Royal Society of Chemistry Publishing Editors
13:00	Introductory Lecture - Spiers Memorial Lecture (Session chair: Georg Pabst)
	Gerald W. Feigenson
	Cornell University, USA
	Session 1: Plasma membrane asymmetry and lipid homeostasis
	(Session chair: Georg Pabst)
14:00	Manipulation and analysis of plasma membrane lipids and lipid asymmetry to
	define ordered domain (raft) formation and function in cells
	Erwin London
	Stony Brook University, USA
14:05	TBC
	Kandice Levental
	Virginia University, USA
14:10	Nonequilibrium asymmetry in the living cell membrane
	Madan Rao
44.45	National Centre for Biological Sciences, India
14:15	Discussion
15:30	Refreshments
	Session 2: Engineering plasma membrane mimics (Session chair: Karin Riske)
16:00	TBC
10.00	Heiko Heerklotz
	University of Freiburg, Germany
16:05	TBC
10.00	Neha Kamat
	Northwestern University, USA
16:10	Fabrication and characterization of asymmetric giant unilamellar vesicles with
	anionic lipids
	Arne Gericke
	Worcester Polytechnic Institute, USA
16:15	Engineering of asymmetric glycoliposomes
	Francisco Barrera
	University of Tennessee, USA
16:20	Discussion
18:00	Lightning presentations – (by invitation of the Scientific Committee)
18:15	Poster session and drinks reception
19:45	Close

Structural and functional asymmetry of plasma membranes

23-25 April 2025 | London, UK

Faraday Discussions

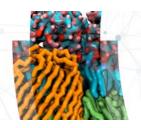

Thursday 24 April 2025

	Session 3: Structure and dynamics of asymmetric membranes
	(Session chair: Syma Khalid)
09:00	TBC
	Markus Deserno
	Carnegie Mellon University, USA
09:05	The many faces of membrane tension for biomembranes with transbilayer
	asymmetry Reinhard Linewalay
	Reinhard Lipowsky Max Planck Institute of Colloids and Interfaces, Germany
09:10	Effects of differential intra-membrane wetting on membrane conformation and
03.10	lateral organization
	Michael Kozlov
	Tel Aviv University, Israel
09:15	Discussion
10:30	Refreshments
	Session 3 continued: Structure and dynamics of asymmetric membranes
	(Session chair: Rumiana Dimova)
11:00	NMR order parameters and dynamics in asymmetric membranes
	Daniel Huster
44.05	University of Leipzig, Germany
11:05	Sensitivities of experimental techniques to various types of membrane
	asymmetry Milka Doktorova
	University of Virginia School of Medicine, USA
	Tomversity or virginia concer or weatonic, cort
11:10	Measuring the mechanical properties of asymmetric lipid membranes in ultra-
11:10	Measuring the mechanical properties of asymmetric lipid membranes in ultra- coarse-grained simulations – new methods and insights
11:10	Measuring the mechanical properties of asymmetric lipid membranes in ultra- coarse-grained simulations – new methods and insights Oded Farago
11:10	coarse-grained simulations – new methods and insights
11:15	coarse-grained simulations – new methods and insights Oded Farago
	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch
11:15	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes
11:15 12:30	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid)
11:15	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC
11:15 12:30	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke
11:15 12:30 13:45	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke EPFL, Switzerland
11:15 12:30	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke EPFL, Switzerland Using phase-resolved vibrational sum-frequency imaging to probe the impact
11:15 12:30 13:45	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke EPFL, Switzerland Using phase-resolved vibrational sum-frequency imaging to probe the impact of head-group functionality on the hierarchical domain structure in lipid
11:15 12:30 13:45	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke EPFL, Switzerland Using phase-resolved vibrational sum-frequency imaging to probe the impact
11:15 12:30 13:45	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke EPFL, Switzerland Using phase-resolved vibrational sum-frequency imaging to probe the impact of head-group functionality on the hierarchical domain structure in lipid membranes
11:15 12:30 13:45	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke EPFL, Switzerland Using phase-resolved vibrational sum-frequency imaging to probe the impact of head-group functionality on the hierarchical domain structure in lipid membranes Alexander Fellows Fritz Haber Institut, Germany The endogenous role of calcium ions in creating and maintaining
11:15 12:30 13:45	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke EPFL, Switzerland Using phase-resolved vibrational sum-frequency imaging to probe the impact of head-group functionality on the hierarchical domain structure in lipid membranes Alexander Fellows Fritz Haber Institut, Germany The endogenous role of calcium ions in creating and maintaining phosphatidylserine lipid asymmetry
11:15 12:30 13:45	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke EPFL, Switzerland Using phase-resolved vibrational sum-frequency imaging to probe the impact of head-group functionality on the hierarchical domain structure in lipid membranes Alexander Fellows Fritz Haber Institut, Germany The endogenous role of calcium ions in creating and maintaining phosphatidylserine lipid asymmetry John Conboy
11:15 12:30 13:45 13:50	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke EPFL, Switzerland Using phase-resolved vibrational sum-frequency imaging to probe the impact of head-group functionality on the hierarchical domain structure in lipid membranes Alexander Fellows Fritz Haber Institut, Germany The endogenous role of calcium ions in creating and maintaining phosphatidylserine lipid asymmetry John Conboy University of Utah, USA
11:15 12:30 13:45 13:50	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke EPFL, Switzerland Using phase-resolved vibrational sum-frequency imaging to probe the impact of head-group functionality on the hierarchical domain structure in lipid membranes Alexander Fellows Fritz Haber Institut, Germany The endogenous role of calcium ions in creating and maintaining phosphatidylserine lipid asymmetry John Conboy University of Utah, USA Discussion
11:15 12:30 13:45 13:50	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke EPFL, Switzerland Using phase-resolved vibrational sum-frequency imaging to probe the impact of head-group functionality on the hierarchical domain structure in lipid membranes Alexander Fellows Fritz Haber Institut, Germany The endogenous role of calcium ions in creating and maintaining phosphatidylserine lipid asymmetry John Conboy University of Utah, USA Discussion Refreshments
11:15 12:30 13:45 13:50	coarse-grained simulations – new methods and insights Oded Farago Ben Gurion University, Israel Discussion Lunch Session 3 continued: Structure and dynamics of asymmetric membranes (Session chair: Syma Khalid) TBC Sylvie Roke EPFL, Switzerland Using phase-resolved vibrational sum-frequency imaging to probe the impact of head-group functionality on the hierarchical domain structure in lipid membranes Alexander Fellows Fritz Haber Institut, Germany The endogenous role of calcium ions in creating and maintaining phosphatidylserine lipid asymmetry John Conboy University of Utah, USA Discussion

15:45	Fusion of asymmetric membranes – the emergence of a preferred direction
	Gonen Golani
	Haifa University, Israel
15:50	Elucidating the bending dynamics of asymmetric membranes by direct
	derivation of their energy landscape
	Giacomo Fiorin
	National Institutes of Health, USA
15:55	The influence of higher order geometric terms on the asymmetry and
	dynamics of membranes
	Axel Voigt
	TU Dresden, Germany
16:00	Discussion
17:15	Close of session
18:45	Pre dinner drinks
19:15	Conference dinner – Library, Burlington House

Structural and functional asymmetry of plasma membranes

23-25 April 2025 | London, UK

Faraday Discussions

Friday 25 April 2025

	Session 4: Proteins in asymmetric membranes
	(Session chair: Raya Sorkin)
09:30	Membrane protein function and loss of asymmetry
00.00	Edward Lyman
	University of Delaware, USA
09:35	The transbilayer asymmetry of PI(4,5)P2 enables fast kinetics of the Fibroblast
00.00	Growth Factor 2 membrane translocation
	<u>Fabio Lolicato</u> , Manpreet Kaur
	Heidelberg University, Germany
09:40	Discussion
10:30	Refreshments
	Session 4 continued: Proteins in asymmetric membranes
	(Session chair: John Seddon)
11:00	Protein induced membrane asymmetries modulate OMP folding rates
	Sheena E. Radford
	University of Leeds, UK
11:05	Asymmetric properties of transmembrane proteomes
	Joseph Lorent
	UCLouvain, Belgium
11:10	Simulating membrane proteins in asymmetric membranes
	Luca Monticelli
	INSERM/CNRS, France
11:15	Discussion
12:30	Concluding remarks lecture (Session chair: John Seddon)
	Felix Goni
	University of Basque Countries, Spain
13:00	Acknowledgements and presentation of poster prizes
13:15	Close of meeting and lunch

All timings are in BST
